Chisom Onu

Senior Software Developer (Backend) at FirstBank Nigeria

Summary

I am a senior software engineer with lots of hands-on development experiences and solved challenges in Microsoft .Net Development environment.

I live out development not just as a job but also as a lifestyle which has made me to be on the look out for collaborative learning environments and work teams. I am always open to fresh ideas and new technology stack once you can prove how effective the technology is in solving problems. I love to work hard with good sense of smartness and equally love to be appreciated for these.

I am a team player and do well in supervisory role too especially with young developers who needs grooming. I am a fan of clean coding as a software engineering principle.

This, thus, summarizes Chisom Onu
